Thank you Rooni, this is great. I hope you can come watch some of the coring/testing -or go to the Sta. Cruz lab.

Subject: FW: CPG's NBSA Sedflume Comments

Hi Eugenia,  
Attached is a table listing the selection criteria for the stations we'd proposed for in situ Sedflume and consolidation core testing. Also attached is a revised version of Figure 1 from our original memo on this topic, modified to show the station IDs. Please let us know if you need any further information in this regard. Thanks,  
Rooni.

Thank you Rob. In response to comments from the last modeling meeting, we are putting together a table justifying the SEDFLUME locations selected by the EPA team. The table will include: contaminant concentrations, grain size, shear stress and depth information for each location. We plan to send this to you this Thursday or maybe sooner. Will it be possible for the CPG team to put together a similar table justifying the selected locations and send it to us by the end of this week or early next week, please? Let me know if we need to discuss. Thank you,  
e

Subject: CPG's NBSA Sedflume Comments

Eugenia and Stephanie:

Attached are the CPG's comments and recommendations on the Sedflume coring program.

The CPG appreciates the opportunity to review and comment on this QAPP.

My apologies for the delay in submitting these comments.

R/  
Rob
